

Association Inauguration

The Zoology Department was inaugurated by Mr. Angusamy, District Forest Officer, Cuddalore on 3rd October 2013. He motivated our students by his inspirational speech in which he emphasized the importance of our mother environment and various factors that lead to its pollution. He also stressed the measures and care to be adapted by the students community at large to protect the environment. He also distributed the certificate for the environment club members who actively participated in various activities.

On the same day forestation campaign was organized in the College premise which was presided over by our Respected Principal, students of Environment Club.

Our students enthusiastically participated in the above event and actively engaged themselves in the campaign.
