YEAR - I		18PIT11
SEMESTER - I	PROBLEM SOLVING TECHNIQUES USING C	HRS/WK - 5
MAIN - 1		CREDIT - 4

To inculcate primary programming skills among the students.

Course Outcomes:

At the end of the Course the students should be able to exhibit

- **CO1: Knowledge pertaining to C-Language Fundamentals**
- **CO2: Logic using Control Statements**
- **CO3:** Modular Programming using Functions
- CO4: Knowledge pertaining to arrays and structures.
- CO5: Advanced Programming techniques using pointers, files and graphics Concepts.

	YEAR - I		18PIT11
S	EMESTER - I	PROBLEM SOLVING TECHNIQUES USING C	HRS/WK - 5
	MAIN - 1		CREDIT - 4

Introduction: Introduction to C – Constants, Variables, Data types – Operators and Expressions.

UNIT - II

Input / Output and Control Structures : Managing Input and Output operations – Decision Making and Branching – Decision making and Looping.

UNIT - III

Arrays and Functions: Arrays – Character Arrays and Strings – User defined Functions – Built-in-Functions.

UNIT - IV

Structures and Pointers: Structures and unions - Pointers - Pointers with Arrays - Pointers with structures.

UNIT - V

File Management and Graphics: File management - Dynamic memory allocation – Preprocessors – Graphics in C.

TEXT BOOK :

YEAR - I
SEMESTER - I
MAIN - 2

18PIT12						
HRS/WK - 5						
CREDIT - 4						

To make the students to acquire the basic knowledge about Information technology.

Course Outcomes:

At the end of the Course the students should be able to exhibit

- **CO1:** Knowledge pertaining to basics of Computers
- **CO2:** Proficiency in Computer Software and OS
- CO3: Knowledge pertaining to Network Communication
- **CO4:** Knowledge pertaining to Network Applications.

CO5: Expertise in Latest IT trends.

UNIT – I

Introduction to Computers: Computer system concepts - characteristics of computer- generations and types of computer - components of computer system - Booting process- classification of digital computer system - organization of computers - Input and Output devices - Storage devices.

UNIT – II

Computer Software: System software - application software – firmware. **Programming languages classification:** machine language - assembly language and high-level language. **Evolution of programming languages:** first generation - second generation - third generation and fourth generation languages. **Language translator:** Compiler - Interpreter and Assembler. **Operating System:** Definition – Job - Objective and evolution of operating system - Types of operating systems.

UNIT - III

Network Communication: Definition – Criteria - advantages and limitations of computer networking - Communication process - Communication types - Types of computer network - Network topology - LAN and other network related protocols - OSI model - TCP/IP model - Networking Components.

UNIT - IV

Network Applications: Introduction about Internet - Internet basics - Internet protocols - Internet addressing - Browser –WWW - E-mail – telnet – ftp – application - benefits and limitation of internet - electronic conferencing - teleconferencing.

UNIT – V

Latest IT Trends: E-Commerce - M-Commerce - Artificial Intelligence - Computational Intelligence - Geographic Information System (GIS) - Data Mining. **Role of IT in different Areas** : Education, Industry, Banking, Marketing, Public Services and others.

TEXT BOOK:

Introduction to E-Commerce: The Revolution is just beginning - A brief History. Understanding Ecommerce: Organizing Themes.

UNIT - II [15 Hrs] **E-Commerce** business models and concepts: E-commerce Infrastructure E-Commerce Business Models - Major Business to Consumer(B2C) Business Models - Major Business to Business (B2B) Business Models - Business Models in emerging E-Commerce Business Areas. How the Internet and Web change the Business: Strategy, Structure and Process, The Internet and World Wide Web: The Internet - Technology background - The Internet Today - The Internet II - The Future Infrastructure - The World Wide Web - The Internet and the Web - Features.

UNIT - III

Building an E-Commerce Web site, Security and Payment: A systematic approach - The E-Commerce Security Environment - Security Threats in the E-Commerce Environment - Technology Solution - management policies - Business procedures and public laws - Payment System - E-Commerce payment system - Electronic billing presentment and payment.

UNIT - IV

E-Commerce Marketing concepts, online retailing and services, Consumer Online: The Internet audience and Consumer behavior - Basic Marketing Concepts - Internet marketing technologies -B2C and B2B E - Commerce marketing and Business strategies - The retail sector - Analyzing the viability of online firms - E-Commerce in auction: E-tailing Business Models - Common Themes in Online retailing - The service sector: offline and online - Online financial services - Online travel services - Online career services.

UNIT - V

Social Networks, Auctions and Portals: Social Networks and Online Communities - Online auctions - E-Commerce Portals.

I(2)		

Introduction to information systems (IS): why study IS- why business need information technology (IT) - fundamentals of IS concepts - overview of IS - solving business problems with IS - developing IS solutions.

UNIT - II

Information systems for business operations: Business IS – marketing, manufacturing, human resource, accounting and financial information systems - transaction processing system management information and decision support systems.

UNIT - III

Managing information technology: Managing information resource and technologies - global IT management - planning and implementing business change with IT.

UNIT - IV

Enterprise Resource Planning (ERP): an overview – benefits of ERP – ERP and related technologies - business process reengineering - data warehousing - data mining - online analytical processing – supply chain management.

UNIT - V

ERP implementation: ERP implementation life cycle - implementation methodology - hidden cost - organizing the implementation - vendors, consultants and users contracts with vendors, consultants and employees project management and monitoring - ERP present and future - turbo change the ERP systems – enterprise integration applications – ERP and E-commerce – ERP and Internet.

C PROGRAMMING AND WEB TECHNOLOGIES

Objective:

- To enable the students to learn different C Programming concepts.
- To enable the students to learn Web Development and .Net Application Tools.

Course Outcomes:

At the end of the Course the students should be able to exhibit

CO1: Knowledge pertaining to C-Language Fundamentals
CO2: Logic using Control Statements
CO3: Modular Programming using Functions
CO4: Knowledge pertaining to arrays and structures.
CO5: Advanced Programming techniques using pointers, files

Course Outcomes: At the end of the Course the students should be able to exhibit

CO1: Knowledge pertaining to HTML Fundamentals

CO2: Designing capabilities using CSS

CO3: Modular Programming using Scripts.

CO4: Web Site Development using ASP.Net.

CO5: Web Site Development with database support using ADO.Net.

YEAR - I SEMESTER - I PRACTICAL - I

C PROGRAMMING AND WEB TECHNOLOGIES

C- Programming :

- 1. Create console-based applications using C language.
- 2. Develop simple console-based programs using C language with features like decision making statements, loops.
- 3. Write modular programs by using functions.
- 4. Use preprocessor directives in a program.
- 5. Use pointers to handle integer arrays.
- 6. Develop C programs using structures, pointers.
- 7. Use pointers to handle integer arrays, strings and files.
- 8. Process data in files using file I/O functions.
- 9. Develop C programs using dynamic memory allocation.
- 10. C program to find binary addition and binary subtraction.

Web Technologies :

- 1. Usage of Simple HTML commands, Graphics and image formats and Background Graphics and Color.
- 2. HTML Program to demonstrate the Usage of Tables, Frames, Forms, hyperlinks.
- 3. How to create a simple CSS style sheet using notepad.
- 4. Write CSS code to apply different style (color, background color).
- 5. Write a JavaScript function that converts upper case to lower case, and lower case to upper case in one form and display it in another form.
- 6. Write a JavaScript code block, which validates a username and password.
 - a) If either the name or password field is not entered display an error message.
 - b) The fields are entered do not match with default values display an error message.
 - c) If the fields entered match, display the welcome message in another page.
- 7. Write Asp.net program to find sum of all digits of a given number and check whether the given number is an Armstrong number and display the result using a popup window.
- 8. Write a Asp.net program to get substring from a given string and change the color using scroll bar, font size and name using a value entered in a text box.
- 9. Write an Asp.net program to store the staff's general information like Staff_id, name, mobile_no, Email_id, DOB.,etc., in a database using Validation control and calendar control.
- 10. Develop a simple database program to prepare a student mark Sheet using ms-access simple applications using ASP.

YEAR – I		18JPIT11
SEMESTER - I	C PROGRAMMING OR WEB TECHNOLOGIES	HRS/WK –5
PROJECT – I		CREDIT – 4

About the Project:

- The project is of 5 hours/cycle for each semester duration and a student is expected to do planning, analysing, designing, coding, and implementing the project.
- The initiation of project should be with the project proposal.
- The synopsis approval will be given by the project guides.

Problem:

• Develop a project by choosing any topic in C Programming or Web Technologies.

The project proposal should include the following:

- Title
- Objectives
- Input and output
- Details of modules and process logic
- Limitations of the project
- Tools/platforms, Languages to be used
- Scope of future application

The project work should be an individual project and a project report should be submitted at the end of the semester. The students shall defend their project in front of experts during practical examinations.

YEAR – I
SEMESTER - II
MAIN - 4

OBJECTIVE:

To Impart sound knowledge in Object Oriented Programming using JAVA.

Course Outcomes:

At the end of the Course the students should possess

CO1: Proficiency in Classes & Objects in Java.

CO2: Proficiency in Packages, Interfaces and Threads.

CO3: Knowledge pertaining to AWT.

CO4: Application developing skills using RMI.

CO5: Application developing skills using Servlets.

YEAR – I	OBJECT ORIENTED PROGRAMMING USING JAVA	18PIT21
SEMESTER - II		HRS/WK – 5
MAIN - 4		CREDIT – 4

Introduction to Classes & Objects in Java: Introduction to Java - Features of Java - Data types -Classes and Objects - Constructors - String Class - Using Super - Abstract class.

UNIT - II

Packages, Interfaces and Threads: Creating Packages – Importing Packages – Interfaces - Defining an Interface, Implementing Interfaces - Exception Handling (Try, Catch, Throw and Throws) -Thread – Multithreading.

UNIT – III

Working with Windows using AWT Classes : AWT: AWT Hierarchy (Components & Containers) - AWT Controls (Label, TextField, TextArea, CheckBox, Button) - Layouts - Sample Program using AWT Controls. Applets: Introduction to Applets – Life Cycle of Applets – Sample program using Applets.

UNIT – IV

Networks & RMI : Networks basics - Socket Programming - Proxy Servers - TCP/IP Sockets - INet Address - URL - Datagrams - Architecture of RMI - An example program using RMI.

UNIT - V

Database & Java Servlets: JDBC Overview – JDBC Drivers – Connection Class – Command Class - ResultSet Class. Servlet: Servlet Overview - Servlet Terminology - Servlet API - HTTP Servlet Class - Servlet Life cycle - Session Tracking in Servlets (Cookies, Hidden Form Field, URL Rewriting-HTTP Session) - Create a Servlet in NetBeans.

YEAR – I						
SEMESTER - II						
MAIN - 5						

18PIT22
HRS/WK – 5
CREDIT – 4

To enable the students to learn the various concepts in Relational Database Management system and to impart knowledge on SQL and PL/SQL statements.

Course Outcomes: At the end of the Course the students should possess

- **CO1: Proficiency in SQL Basics.**
- CO2: Proficiency in Advanced SQL Concepts.
- CO3: Knowledge pertaining to SQL Loader.
- CO4: Application developing skills using PL/SQL.
- CO5: Application developing skills using Cursors and Triggers.

YEAR – I	DELATIONAL DATADASE MANACEMENT	18PIT22
SEMESTER - II	RELATIONAL DATABASE MANAGEMENT SYSTEMS	HRS/WK – 5
MAIN - 5	5151ENI5	CREDIT – 4

SQL Basics: Introduction to RDBMS - Normalization: First Normal form-Second Normal form-Third Normal form-Creating a Table-Integrity Constraints- Creating, Modifying and Dropping -Select, from, where and Order by-Logic and Value: Single value tests-LIKE-NULL and NOT NULL-Simple tests against a list of values-Combining logic-Dropping tables-Altering a table: Adding or modifying a column-Changing Data: insert-multiple inserts-update-merge-delete-rollback-commit and Save point.

UNIT - II

SQL Concepts: Data types-String functions-Single value functions-Aggregate functions-List functions-Findings Rows with MAX or MIN-Date functions-Conversion functions-Creating a view-Stability of a view-Order by views-Creating a read only view -Grouping Things Together: The use of group by and having-views of Groups-Sub queries-Advanced Sub queries-Outer joins-Natural and inner joins-Union, Intersect, and minus.

UNIT - III

Advanced SQL Concepts: Decode and Case: if, then, else-Decode and Case-Creating a table from a table-Using Partitioned Tables: Creating a Partitioned Table-Creating Sub partitions-Indexes-Clusters-Sequences.

Users, Roles and Privileges: Creating a user-Password Management-Standard Roles-Format for grant command-Revoking privileges-What users can Grant: Moving to another user -Create synonym-Create a role-Granting privileges to a role-Granting a role to another role-Adding password to a role-Removing password from a role – Enabling & Disabling roles-Revoking privileges from a role-Drop a role.

UNIT - IV

Using SQL*Loader to load data: The Control file-Loading Variable length data-Starting the load-Syntax-Managing the data loads-Tuning Data loads-Using External Tables: Access an external data-External table: Creation-Limitation-Benefits.

Object-Relational Databases: Implementing Types-Object Views- Methods-Collectors (Nested Tables and Varying Arrays)-Using Large Objects-Advanced Object –Oriented Concepts.

UNIT - V

Introduction to PL/SQL: Declarations section-Executable commands section-Exception handling section-Cursor Management-Procedures, Functions & Packages-Triggers: Syntax-Types of Triggers: Row level- Statement level-before & after-Instead of Schema-Database level triggers-Enabling & Disabling triggers.

YEAR – I		18EPIT24
SEMESTER - II	CLOUD COMPUTING	HRS/WK – 5
ELECTIVE - II(1)		CREDIT – 5

Introduction to Cloud Computing : Cloud Computing: Definition, Cloud Architecture, Cloud Storage, Advantages and Disadvantages of Cloud Computing, Companies in the Cloud Today, Cloud Services, Cloud Types: The NIST Model, The Cloud Cube Model, Deployment Models, Service Models Cloud Computing, Service Models: Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Software as a Service (SaaS).

UNIT - II

Developing Cloud Services : Web-Based Application - Pros and Cons of Cloud Service Development - Types of Cloud Service Development - Software as a Service - Platform as a Service - Web Services - On-Demand Computing - Discovering Cloud Services Development Services and Tools – Amazon Ec2 – Google App Engine – IBM Clouds.

UNIT - III

Cloud Computing for Everyone : Centralizing Email Communications - Collaborating on Schedules - Collaborating on To-Do Lists - Collaborating Contact Lists - Cloud Computing for the Community – Collaborating on Group Projects and Events – Cloud Computing for the Corporation.

UNIT - IV

Using Cloud Services : Collaborating on Calendars, Schedules and Task Management – Exploring Online Scheduling Applications – Exploring Online Planning and Task Management – Collaborating on Event Management - Collaborating on Contact Management - Collaborating on Project Management - Collaborating on Word Processing - Collaborating on Databases - Storing and Sharing Files.

UNIT - V

Cloud Security and Challenges : Cloud computing security architecture: Architectural Considerations- General Issues, Trusted Cloudcomputing, Secure Execution Environments and Communications, Micro-architectures; Identity Management and Access control Identity management, Access control, Autonomic Security Cloudcomputing security challenges: Virtualization security management virtual threats, VM SecurityRecommendations, VM--Specific Security techniques, Secure Execution Environments and Communications in cloud.

SEMESTER - II
PRACTICAL - II

18PITP22 HRS/WK – 5 CREDIT - 4

Objective:

To get hands on experience in developing Programs using Java applications and to enable students to write SQL queries and work with PL/SQL.

Course Outcomes: At the end of the Course the students should possess

CO1: Application development efficiency using Java basic statements.

CO2: Application development efficiency using AWT Controls.

CO3: Network Application development skill.

CO4: Application developing skills using RMI.

CO5: Application developing skills using Servlets.

Course Outcomes: At the end of the Course the students should possess

CO1: Proficiency in SQL Basics.

CO2: Proficiency in Advanced SQL Concepts.

CO3: Knowledge pertaining to SQL Loader.

CO4: Application developing skills using PL/SQL.

CO5: Application developing skills using Cursors and Triggers.

YEAR – I **SEMESTER - II PRACTICAL - II**

JAVA PROGRAMMING AND RDBMS

18PITP22 HRS/WK - 5**CREDIT - 4**

JAVA:

- [40 Hrs] 1. To find the area and perimeter of a Circle and Rectangle using Buffered Reader Class.
- 2. String Manipulation using String and String Buffer Class.
- 3. Implementing packages for simple application.
- 4. Implementing Interfaces in Java.
- 5. Create an application using AWT Controls.
- 6. Loading image onto Applet.
- 7. Chatting application using TCP/IP.
- 8. To develop a program for factorial of a number using RMI.
- 9. Create a Login form using Servlet in NetBeans.
- 10. To develop an application for Student Mark List using Servlet with Database (Ms-Access).

RDBMS:

- 1. Writing Basic SQL Statements
- 2. Table Constraints
- 3. Working with Built-in-functions of SQL.
- 4. Joins & Sub queries
- 5. Loading data using SQL*loader
- 6. PL\SQL blocks.
- 7. Exception Handling
- 8. Cursors.
- 9. Creating Stored procedures, functions and packages.
- 10. Triggers.
- 11. Working with Abstract Data Types
 - Types i)
 - **Object Views** ii)
 - Methods iii)
 - Nested Tables iv)
 - v) Varying arrays.

YEAR – I
SEMESTER - II
PROJECT - II

18JPIT22
HRS/WK – 5
CREDIT – 4

About the Project:

- The project is of 5 hours/cycle for each semester duration and a student is expected to do planning, analyzing, designing, coding, and implementing the project.
- The initiation of project should be with the project proposal.
- The synopsis approval will be given by the project guides.

Problem:

• Develop a project by choosing any topic in Java Programming or RDBMS.

The project proposal should include the following:

- Title
- Objectives
- Input and output
- Details of modules and process logic
- Limitations of the project
- Tools/platforms, Languages to be used
- Scope of future application

The project work should be an individual project and a project report should be submitted at the end of the semester. The students shall defend their project in front of experts during practical examinations.

YEAR – II		18PIT31
SEMESTER - III	MOBILE APPLICATION DEVELOPMENT	HRS/WK – 4
MAIN - 7		CREDIT - 4

To make the students to acquire mobile application development skills in Android.

Course Outcomes: At the end of the Course the students should possess

CO1: Knowledge pertaining to basic of Android..

CO2: Proficiency in Activities in Android.

CO3: Proficiency in Layouts and views.

CO4: Proficiency in Views and Data Persistence.

CO5: Knowledge pertaining to Databases and communication.

YEAR – II
SEMESTER - III
MAIN - 8

Building blocks of PHP: Basic syntax - Variables - Data Types - Operators and expressions-Constants. Flow Control: Switch flow- Loops- Code Block- Sending data to the browser-Working with Arrays: Arrays- Creating array- Array related Functions-Working with Function: Function-Calling Function- Defining Function- Returning the Values from user defined function- Variable Scope- Argument.

UNIT - II

Working with Strings, Date and Time Functions: Formatting String with PHP- Date and TimeFunction-StringManipulation and InvestigatingStrings with PHP-Working with Forms: Creating form- Handling form- Validating form data- Accessing form data- use of Hidden fields to save State- Redirecting user- file Upload-Working with Cookies and User Session: Introduction of Cookie- Setting a Cookie with PHP-Introduction of Session and Improving Session Security- Starting a Session- Working with Session Variables- Passing Session Id in the query String- Destroying Session and Unsetting Variables.

UNIT - III

Error Handling and Debugging: General error types and debugging- displaying PHP errors-Adjusting Error Reporting- Creating Custom error handler- PHP debugging techniques-Filter: Types of Filter- Functions of Filter- Validate the data with filter option and sanitize-Working with files: Include Files with INCLUDE- creating and deleting files- opening a file for reading- writing or Appending- Reading from files- Validating Files.

UNIT - IV

Working with Directories: Directory related function- \$DIR object in PHP-Working with Images: Image related function- Miscellaneous function-Introduction To OOP: The basic- auto loading objects- Class- Extends- Constructs- Scope Resolution Operator- Parent- serializing object- The magic objects sleep and awake- reference inside the constructor- comparing objects- Visibilityoverloading- object interface- pattern- magic method.

UNIT - V

Learning Basic SQL **Command:** Table Creation-Insert row-Select Command and Delete Command-Using Where Clause-Update Replace Command-String Function- Date and Time Functions- Stored Procedures- Join- Indexing and Sorting query-Using MySQL with PHP: Connecting to MySQL and selecting the database- executing simple queriesretrieving query results- counting return Records- updating- Record Addition- Viewing Record- and Deletion Record with PHP.

YEAR – II		18EPIT33A
SEMESTER - III	ETHICAL HACKING	HRS/WK – 5
ELECTIVE-III(2)		CREDIT – 5

UNIT - I

Introduction: Data Theft in Organizations, Elements of Information Security, Authenticity and NonRepudiation, Security Challenges, Effects of Hacking, Hacker - Types of Hacker, Ethical Hacker, Hacktivism - Role of Security and Penetration Tester, Penetration Testing Methodology, Networking & Computer Attacks – Malicious Software (Malware), Protection Against Malware, Intruder Attacks on Networks and Computers, Addressing Physical Security - Key Loggers and Back Doors.

UNIT - II

Hacking: Web Tools for Foot Printing, Conducting Competitive Intelligence, Google Hacking, Scanning, Enumeration, Trojans & Backdoors, Virus & Worms, Proxy & Packet Filtering, Denial of Service, Sniffer, Social Engineering – shoulder surfing, Dumpster Diving, Piggybacking.

UNIT - III

Attacks: Physical Security - Attacks and Protection, Steganography - Methods, Attacks and Measures, Cryptography – Methods and Types of Attacks, Wireless Hacking, Windows Hacking, LinuxCryptography – Methods and Types of Attacks, Wireless Hacking, Windows Hacking, Linux Hacking

UNIT - IV

[15 Hrs] Security Defenses: Routers, Firewall & Honeypots, IDS & IPS, Web Filtering, Vulnerability, Penetration Testing, Session Hijacking, Web Server, SQL Injection, Buffer Overflow, Reverse Engineering, Email Hacking, Incident Handling & Response, Bluetooth Hacking, Mobile Phone Hacking.

UNIT - V

Ethical Hacking - Terminologies: Social Engineering, Host Reconnaissance, Session Hijacking, Hacking - Web Server, Database, Password Cracking, Network and Wireless, Trojan, Backdoor, UNIX, LINUX, Microsoft, Buffer Overflow, Denial of Service Attack.

TEXT BOOK:

YEAR - II
SEMESTER -III
ELECTIVE $-IV(2)$

18EPI34A HRS/WK - 5 **CREDIT - 5**

UNIT - I

Introduction to Artificial Intelligence: The AI problems – The underlying Assumption – What is an AI technique? - The level of the model - Criteria for success - Problems, Problem spaces and Search: Defining the problem as a state space search – production systems – problem characteristics - production system characteristics - Issues in the design of search programs.

UNIT - II

Heuristic Search Techniques: Generate and test – Hill Climbing – Best First Search (A* Search) – Problem Reduction (AO * Algorithm) - Constraint Satisfaction - Means-Ends Analysis -Knowledge Representation Issues: Representation and Mappings - Approaches to Knowledge Representation - Issues in Knowledge Representation.

UNIT - III

Using Predicate logic: Representing simple facts in logic – Representing Instance and ISA Relationships - Computable functions and Predicates - Resolution - Natural Deduction -Representing knowledge using Rules: Procedural versus Declarative knowledge - Logic programming – Forward versus Backward Reasoning.

UNIT - IV

Natural Language Processing: Introduction – Syntactic processing – Semantic Analysis – Learning : What is Learning? - Rote Learning - Learning from Examples: Induction - Explanation based Learning - Discovery - Analogy - Formal Learning theory - Neural net learning and Genetic learning.

UNIT - V

Perception and Action: Real time search – Perception – Action – Robot Architectures – Case study on Robot Architecture.

ANDROID APPLICATIONS AND WEB DEVELOPMENT USING PHP

18PITP33	
HRS/WK – 5	
CREDIT - 5	

Objective:

- To enable the students to learn the programming concepts in Android applications.
- To enable the students to build applications in PHP.

Course Outcomes: At the end of the Course the students should be able to

- **CO1: Develop Basic Android Apps**
- CO2: Develop Android Apps Interacting with Third Party application and Sqlite.
- **CO3:** Develop Application using Forms in PHP.
- CO4: Develop different application such as online shopping cart, banking App.
- CO5: Develop Database application using Android and PHP

ANDROID APPLICATIONS AND WEB DEVELOPMENT USING PHP

ANDROID APPLICATIONS:

- 1. Write android program to change the background of your activity.
- 2. Write android program to perform all operations using calculators.
- 3. Write android program to change image displayed on the screen
- 4. Write android program to demonstrate action button by implementing on click listener.
- 5. Write android program to demonstrate countdown timer application.
- 6. Write android program to demonstrate layouts in an activity.
- 7. Write android program to display Google Maps in Android.
- 8. Write android program to reading and writing to a file on SD card.
- 9. Write android program to read and write to a SQLite database in Android.
- 10. Write android program to demonstrate content providers in Android.

PHP:

- 1. String and Date functions in PHP.
- 2. Form creation using POST method
- 3. Database Operations using mysql.
- 4. Login form using session.
- 5. Class and Object in PHP.
- 6. Student mark list creation with validation.
- 7. Electricity bill preparation.
- 8. Develop a simple online shopping cart.
- 9. Develop a simple bank application.
- 10. Develop an application for employee pay slip.

YEAR – II SEMESTER - III PROJECT - III

ANDROID APPLICATIONS OR WEB DEVELOPMENT USING PHP

About the Project:

- The project is of 5 hours/cycle for each semester duration and a student is expected to do planning, analysing, designing, coding, and implementing the project.
- The initiation of project should be with the project proposal.
- The synopsis approval will be given by the project guides.

Problem:

• Develop a project by choosing any topic in Android Applications or Web Development using PHP.

The project proposal should include the following:

- Title
- Objectives
- Input and output
- Details of modules and process logic
- Limitations of the project
- Tools/platforms, Languages to be used
- Scope of future application

The project work should be an individual project and a project report should be submitted at the end of the semester. The students shall defend their project in front of experts during practical examinations.

YEAR-II		18JPIT44
SEMESTER - IV	MAIN PROJECT	HRS/WK-30
MAIN PROJECT		CREDIT - 11

Objective:

To expose the students to industry atmosphere and help them to gain knowledge on software development.

At the end of the Course the students should possess

CO1: Project Analysis Technical Skill.CO2: Project Designing Technical Skill.CO3: Project Coding Technical Skill.CO4: Project Testing Technical Skill.CO5: Project Implementation Technical Skill

MAIN PROJECT				

FORMAT FOR PREPARING MAIN PROJECT REPORT

Arrangement of contents

- 1. Title Page
- 2. Bonafide Certificate
- 3. Acknowledgement
- 4. Table of contents
- 5. Abstract
- 6. Chapters of the Report
- 7. References
- 8. Appendices, if any

Appendices should be named as APPENDIX – A

APPENDIX - B

BINDING SPECIFICATION

- Report should be found using flexible cover of thick white art paper.
- The Spine for the bound volume should be of black calio of 2cms width.
- The Cover should be printed in block letters.

MARGIN SPECIFICATION

Тор	:	4 cms
Bottom	:	3 cms
Left	:	4.5 cms
Тор	:	2.5 cms

PAGE NUMBERING

All Page numbers should be typed without punctuation on the bottom-center portion of the page. The Preliminary pages (table of contents and abstract) should be numbered in lowercase roman literals. Papers of main text, starting with Chapter-1, should be consecutively numbered using Arabic numerals.
