YEAR - I
<b>SEMESTER - I</b>
<b>MAIN - 1</b>

To inculcate primary programming skills among the students.

#### **Course Outcomes:**

At the end of the Course the students should be able to exhibit

- **CO1: Knowledge pertaining to C-Language Fundamentals**
- **CO2:** Logic using Control Statements
- **CO3: Modular Programming using Functions**
- CO4: Knowledge pertaining to arrays and structures.
- CO5: Advanced Programming techniques using pointers, files and graphics Concepts.

	YEAR - I		18PIT11
S	EMESTER - I	PROBLEM SOLVING TECHNIQUES USING C	HRS/WK - 5
	MAIN - 1		CREDIT - 4

**Introduction:** Introduction to C – Constants, Variables, Data types – Operators and Expressions.

#### UNIT - II

Input / Output and Control Structures : Managing Input and Output operations – Decision Making and Branching – Decision making and Looping.

#### UNIT - III

Arrays and Functions: Arrays – Character Arrays and Strings – User defined Functions – Built-in-Functions.

#### **UNIT - IV**

Structures and Pointers: Structures and unions - Pointers - Pointers with Arrays - Pointers with structures.

#### UNIT - V

File Management and Graphics: File management - Dynamic memory allocation – Preprocessors – Graphics in C.

#### **TEXT BOOK :**

1. E. Balagurusamy, Programming in ANSIC, Sixth Edition, McGraw-Hill.

#### **REFERENCE BOOKS:**

### UNIT – I

**Introduction to Computers:** Computer system concepts - characteristics of computer- generations and types of computer - components of computer system - Booting process- classification of digital computer system - organization of computers - Input and Output devices - Storage devices.

#### UNIT – II

**Computer Software:** System software - application software – firmware. **Programming languages classification:** machine language - assembly language and high-level language. **Evolution of programming languages:** first generation - second generation - third generation and fourth generation languages. **Language translator:** Compiler - Interpreter and Assembler. **Operating System:** Definition – Job - Objective and evolution of operating system - Types of operating systems.

#### UNIT - III

**Network Communication:** Definition – Criteria - advantages and limitations of computer networking - Communication process - Communication types - Types of computer network - Network topology - LAN and other network related protocols - OSI model - TCP/IP model - Networking Components.

#### UNIT - IV

**Network Applications:** Introduction about Internet - Internet basics - Internet protocols - Internet addressing - Browser –WWW - E-mail – telnet – ftp – application - benefits and limitation of internet - electronic conferencing - teleconferencing.

#### UNIT – V

**Latest IT Trends:** E-Commerce - M-Commerce - Artificial Intelligence - Computational Intelligence - Geographic Information System (GIS) - Data Mining. **Role of IT in different Areas** : Education, Industry, Banking, Marketing, Public Services and others.

#### **TEXT BOOK:**

1. V. Rajaraman, Computer Fundamentals, PHI.

#### **REFERENCE BOOKS:**

- 1. Dennis P. Curtin, Kim foley, KunalSen and Cathleen Morin, Information Technology The Breaking Wave, Tata-McGraw Hill Publications, 2005.
- 2. Leon and Leon, Fundamentals of IT, Leon Tec World.
- 3. Alexis Lean and Mathews Leon, Fundamentals of Information Technology, Vikas Publication House, Delhi.
- 4. Cyganski, Information Technology inside and outside, Pearson Publication.

YEAR – I		18PIT13
<b>SEMESTER - I</b>	WEB TECHNOLOGIES	HRS/WK - 5
MAIN - 3		CREDIT - 4

HTML: Introduction: Structure of HTML-tag and elements- attributes Tells us about elements- basic text formatting- presentational- phase elements- lists- basic link- adding images, flash, video and audio to a webpage- basic table elements and attributes- creating a form with the <form> elementform controls, frames: The <frameset> elements- the <frame> element.

#### UNIT - II

**CSS**: Introduction CSS-CSS properties: Controlling text- text formatting- text pseudo code classesselectors, links: background- lists- tables- outlines- positioning and layout with CSS, design issues: typography - navigation- tables - forms.

#### UNIT - III

Java Script: How to add a script to your pages- the document object model- variables- operatorsfunctions- conditional statements- looping- form validation and enhancement- Java Script librariesmeta tags-HTML5.

#### **UNIT - IV**

ASP.NET: data types- variables- arrays- properties- namespace - method- interface- delegationbutton- textbox- timer -checkbox- radio button - menu.

#### UNIT - V

ASP.NET: Difference between ASP and ASP.net- architecture of ASP.net- difference between code behind window and aspx file-Ad rotator-validation control-calendar controls-ADO.net object model- architecture of ado.net- working with crystal report.

YEAR - I		18EPIT14
SEMESTER - I	<b>E-COMMERCE</b>	HRS/WK - 5
ELECTIVE - I(1)		CREDIT - 5

Introduction to E-Commerce: The Revolution is just beginning - A brief History. Understanding Ecommerce: Organizing Themes.

#### UNIT - II

**E-Commerce** business models and concepts: E-commerce Infrastructure E-Commerce Business Models - Major Business to Consumer(B2C) Business Models - Major Business to Business (B2B) Business Models - Business Models in emerging E-Commerce Business Areas. How the Internet and Web change the Business: Strategy, Structure and Process, The Internet and World Wide Web: The Internet - Technology background - The Internet Today - The Internet II - The Future Infrastructure - The World Wide Web - The Internet and the Web - Features.

#### UNIT - III

Building an E-Commerce Web site, Security and Payment: A systematic approach - The E-Commerce Security Environment - Security Threats in the E-Commerce Environment - Technology Solution - management policies - Business procedures and public laws - Payment System - E-Commerce payment system - Electronic billing presentment and payment.

#### UNIT - IV

E-Commerce Marketing concepts, online retailing and services, Consumer Online: The Internet audience and Consumer behavior - Basic Marketing Concepts - Internet marketing technologies -B2C and B2B E - Commerce marketing and Business strategies - The retail sector - Analyzing the viability of online firms - E-Commerce in auction: E-tailing Business Models - Common Themes in Online retailing - The service sector: offline and online - Online financial services - Online travel services - Online career services.

#### UNIT - V

Social Networks, Auctions and Portals: Social Networks and Online Communities - Online auctions - E-Commerce Portals.

YEAR - I		18EPIT14A
SEMESTER - I	MANAGEMENT INFORMATION SYSTEMS	HRS/WK - 5
ELECTIVE -	MANAGEMENT INFORMATION SISTEMS	CREDIT - 5
I(2)		

Introduction to information systems (IS): why study IS- why business need information technology (IT) - fundamentals of IS concepts - overview of IS - solving business problems with IS - developing IS solutions.

#### UNIT - II

Information systems for business operations: Business IS – marketing, manufacturing, human resource, accounting and financial information systems - transaction processing system management information and decision support systems.

#### UNIT - III

Managing information technology: Managing information resource and technologies - global IT management – planning and implementing business change with IT.

#### **UNIT - IV**

Enterprise Resource Planning (ERP): an overview – benefits of ERP – ERP and related technologies - business process reengineering - data warehousing - data mining - online analytical processing – supply chain management.

#### UNIT - V

ERP implementation: ERP implementation life cycle - implementation methodology - hidden cost - organizing the implementation - vendors, consultants and users contracts with vendors, consultants and employees project management and monitoring - ERP present and future - turbo change the ERP systems – enterprise integration applications – ERP and E-commerce – ERP and Internet.

#### YEAR - I **SEMESTER - I PRACTICAL - I**

#### **C PROGRAMMING AND WEB TECHNOLOGIES**

#### **C-Programming :**

- Create console-based applications using C language. 1.
- Develop simple console-based programs using C language with features like decision making 2. statements, loops.
- 3. Write modular programs by using functions.
- Use preprocessor directives in a program. 4.
- 5. Use pointers to handle integer arrays.
- Develop C programs using structures, pointers. 6.
- Use pointers to handle integer arrays, strings and files. 7.
- 8. Process data in files using file I/O functions.
- Develop C programs using dynamic memory allocation. 9.
- 10. C program to find binary addition and binary subtraction.

#### Web Technologies :

- Usage of Simple HTML commands, Graphics and image formats and Background Graphics and 1. Color.
- 2. HTML Program to demonstrate the Usage of Tables, Frames, Forms, hyperlinks.
- 3. How to create a simple CSS style sheet using notepad.
- Write CSS code to apply different style (color, background color). 4.
- 5. Write a JavaScript function that converts upper case to lower case, and lower case to upper case in one form and display it in another form.
- Write a JavaScript code block, which validates a username and password. 6.
  - a) If either the name or password field is not entered display an error message.
  - b) The fields are entered do not match with default values display an error message.
  - c) If the fields entered match, display the welcome message in another page.
- 7. Write Asp.net program to find sum of all digits of a given number and check whether the given number is an Armstrong number and display the result using a popup window.
- 8. Write a Asp.net program to get substring from a given string and change the color using scroll bar, font size and name using a value entered in a text box.
- 9. Write an Asp.net program to store the staff's general information like Staff id, name, mobile\_no, Email\_id, DOB.,etc., in a database using Validation control and calendar control.
- 10. Develop a simple database program to prepare a student mark Sheet using ms-access simple applications using ASP.

YEAR – I		18JPIT11
SEMESTER - I	C PROGRAMMING OR WEB TECHNOLOGIES	HRS/WK –5
PROJECT – I		CREDIT – 4

#### About the Project:

- The project is of 5 hours/cycle for each semester duration and a student is expected to do planning, analysing, designing, coding, and implementing the project.
- The initiation of project should be with the project proposal.
- The synopsis approval will be given by the project guides.

#### **Problem:**

• Develop a project by choosing any topic in C Programming or Web Technologies.

#### The project proposal should include the following:

- Title
- Objectives
- Input and output
- Details of modules and process logic
- Limitations of the project
- Tools/platforms, Languages to be used
- Scope of future application

The project work should be an individual project and a project report should be submitted at the end of the semester. The students shall defend their project in front of experts during practical examinations.

YEAR – I
<b>SEMESTER - II</b>
MAIN - 4

#### **OBJECTIVE:**

To Impart sound knowledge in Object Oriented Programming using JAVA.

**Course Outcomes:** 

At the end of the Course the students should possess

CO1: Proficiency in Classes & Objects in Java.

**CO2:** Proficiency in Packages, Interfaces and Threads.

CO3: Knowledge pertaining to AWT.

CO4: Application developing skills using RMI.

CO5: Application developing skills using Servlets.

YEAR – I	OD IECT ODIENTED DDOCDAMMING USING	18PIT21
SEMESTER - II	OBJECT ORIENTED PROGRAMMING USING JAVA	HRS/WK – 5
MAIN - 4		CREDIT – 4

**Introduction to Classes & Objects in Java:** Introduction to Java - Features of Java - Data types -Classes and Objects - Constructors - String Class - Using Super - Abstract class.

#### UNIT - II

Packages, Interfaces and Threads: Creating Packages – Importing Packages – Interfaces - Defining an Interface, Implementing Interfaces - Exception Handling (Try, Catch, Throw and Throws) -Thread – Multithreading.

#### UNIT – III

Working with Windows using AWT Classes : AWT: AWT Hierarchy (Components & Containers) - AWT Controls (Label, TextField, TextArea, CheckBox, Button) - Layouts - Sample Program using AWT Controls. Applets: Introduction to Applets – Life Cycle of Applets – Sample program using Applets.

#### UNIT – IV

Networks & RMI : Networks basics - Socket Programming - Proxy Servers - TCP/IP Sockets - INet Address - URL - Datagrams – Architecture of RMI – An example program using RMI.

#### UNIT - V

Database & Java Servlets: JDBC Overview – JDBC Drivers – Connection Class – Command Class - ResultSet Class. Servlet: Servlet Overview - Servlet Terminology - Servlet API - HTTP Servlet Class - Servlet Life cycle - Session Tracking in Servlets (Cookies, Hidden Form Field, URL Rewriting-HTTP Session) - Create a Servlet in NetBeans.

YEAR – I
<b>SEMESTER - II</b>
MAIN - 5

18PIT22
HRS/WK – 5
CREDIT – 4

To enable the students to learn the various concepts in Relational Database Management system and to impart knowledge on SQL and PL/SQL statements.

#### **Course Outcomes:** At the end of the Course the students should possess

- **CO1: Proficiency in SQL Basics.**
- CO2: Proficiency in Advanced SQL Concepts.
- CO3: Knowledge pertaining to SQL Loader.
- CO4: Application developing skills using PL/SQL.
- CO5: Application developing skills using Cursors and Triggers.

YEAR – I	DELATIONAL DATADASE MANACEMENT	18PIT22
<b>SEMESTER - II</b>	RELATIONAL DATABASE MANAGEMENT SYSTEMS	HRS/WK – 5
MAIN - 5	5151EIVI5	CREDIT – 4

**SQL Basics:** Introduction to RDBMS – **Normalization:** First Normal form-Second Normal form-Third Normal form-Creating a Table-Integrity Constraints- Creating, Modifying and Dropping -Select, from, where and Order by-Logic and Value: Single value tests-LIKE-NULL and NOT NULL-Simple tests against a list of values-Combining logic-Dropping tables-Altering a table: Adding or modifying a column-Changing Data: insert-multiple inserts-update-merge-delete-rollback-commit and Save point.

#### UNIT - II

**SQL** Concepts: Data types-String functions-Single value functions-Aggregate functions-List functions-Findings Rows with MAX or MIN-Date functions-Conversion functions-Creating a view-Stability of a view-Order by views-Creating a read only view -Grouping Things Together: The use of group by and having-views of Groups-Sub queries-Advanced Sub queries-Outer joins-Natural and inner joins-Union, Intersect, and minus.

#### UNIT - III

Advanced SQL Concepts: Decode and Case: if, then, else-Decode and Case-Creating a table from a table-Using Partitioned Tables: Creating a Partitioned Table-Creating Sub partitions-Indexes-Clusters-Sequences.

**Users, Roles and Privileges**: Creating a user-Password Management-Standard Roles-Format for grant command-Revoking privileges-What users can Grant: Moving to another user –Create synonym-Create a role-Granting privileges to a role-Granting a role to another role-Adding password to a role-Removing password from a role –Enabling & Disabling roles-Revoking privileges from a role-Drop a role.

#### UNIT - IV

**Using SQL\*Loader to load data**: The Control file-Loading Variable length data-Starting the load-Syntax-Managing the data loads-Tuning Data loads-Using External Tables: Access an external data-External table: Creation-Limitation-Benefits.

**Object–Relational Databases:** Implementing Types-Object Views- Methods-Collectors (Nested Tables and Varying Arrays)-Using Large Objects-Advanced Object –Oriented Concepts.

#### UNIT - V

**Introduction to PL/SQL:** Declarations section-Executable commands section-Exception handling section-Cursor Management-Procedures, Functions & Packages-Triggers: Syntax-Types of Triggers: Row level- Statement level-before & after-Instead of Schema-Database level triggers-Enabling & Disabling triggers.

YEAR – I		<b>18EPIT24</b>
SEMESTER - II	CLOUD COMPUTING	HRS/WK – 5
<b>ELECTIVE - II(1)</b>		CREDIT – 5

Introduction to Cloud Computing : Cloud Computing: Definition, Cloud Architecture, Cloud Storage, Advantages and Disadvantages of Cloud Computing, Companies in the Cloud Today, Cloud Services, Cloud Types: The NIST Model, The Cloud Cube Model, Deployment Models, Service Models Cloud Computing, Service Models: Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Software as a Service (SaaS).

#### UNIT - II

Developing Cloud Services : Web-Based Application - Pros and Cons of Cloud Service Development - Types of Cloud Service Development - Software as a Service - Platform as a Service - Web Services - On-Demand Computing - Discovering Cloud Services Development Services and Tools – Amazon Ec2 – Google App Engine – IBM Clouds.

#### **UNIT - III**

Cloud Computing for Everyone : Centralizing Email Communications - Collaborating on Schedules - Collaborating on To-Do Lists - Collaborating Contact Lists - Cloud Computing for the Community – Collaborating on Group Projects and Events – Cloud Computing for the Corporation.

#### UNIT - IV

Using Cloud Services : Collaborating on Calendars, Schedules and Task Management – Exploring Online Scheduling Applications – Exploring Online Planning and Task Management – Collaborating on Event Management - Collaborating on Contact Management - Collaborating on Project Management - Collaborating on Word Processing - Collaborating on Databases - Storing and Sharing Files.

#### UNIT - V

Cloud Security and Challenges : Cloud computing security architecture: Architectural Considerations- General Issues, Trusted Cloudcomputing, Secure Execution Environments and Communications, Micro-architectures; Identity Management and Access control Identity management, Access control, Autonomic Security Cloudcomputing security challenges: Virtualization security management virtual threats, VM SecurityRecommendations, VM--Specific Security techniques, Secure Execution Environments and Communications in cloud.

### JAVA PROGRAMMING AND RDBMS

#### 18PITP22 HRS/WK – 5 CREDIT - 4

#### JAVA:

[40 Hrs]

[35 Hrs]

- 1. To find the area and perimeter of a Circle and Rectangle using Buffered Reader Class.
- 2. String Manipulation using String and String Buffer Class.
- 3. Implementing packages for simple application.
- 4. Implementing Interfaces in Java.
- 5. Create an application using AWT Controls.
- 6. Loading image onto Applet.
- 7. Chatting application using TCP/IP.
- 8. To develop a program for factorial of a number using RMI.
- 9. Create a Login form using Servlet in NetBeans.
- 10. To develop an application for Student Mark List using Servlet with Database (Ms-Access).

#### **RDBMS:**

- 1. Writing Basic SQL Statements
- 2. Table Constraints
- 3. Working with Built-in-functions of SQL.
- 4. Joins & Sub queries
- 5. Loading data using SQL\*loader
- 6. PL\SQL blocks.
- 7. Exception Handling
- 8. Cursors.
- 9. Creating Stored procedures, functions and packages.
- 10. Triggers.
- 11. Working with Abstract Data Types
  - i) Types
  - ii) Object Views
  - iii) Methods
  - iv) Nested Tables
  - v) Varying arrays.

YEAR – I	
SEMESTER - II	
<b>PROJECT - II</b>	

<b>18JPIT22</b>
HRS/WK – 5
CREDIT – 4

To motivate the students to work in emerging / latest technologies, help the students to develop ability, to apply theoretical and practical tools / techniques to solve real life problems related to industry, academic institutions and research laboratories.

#### **Course Outcomes:**

At the end of the Course the students should be able to develop

CO1: Stand-alone applications using Java or RDBMS Package.

CO2: System Program using Java

CO3: Web Services using Servlet

CO4: A Web Site using Servlet and SQL.

**CO5:** A Novel Application.

YEAR – I
SEMESTER - II
<b>PROJECT - II</b>

<b>18JPIT22</b>
HRS/WK – 5
<b>CREDIT – 4</b>

#### About the Project:

- The project is of 5 hours/cycle for each semester duration and a student is expected to do planning, analyzing, designing, coding, and implementing the project.
- The initiation of project should be with the project proposal.
- The synopsis approval will be given by the project guides.

#### **Problem:**

• Develop a project by choosing any topic in Java Programming or RDBMS.

#### The project proposal should include the following:

- Title
- Objectives
- Input and output
- Details of modules and process logic
- Limitations of the project
- Tools/platforms, Languages to be used
- Scope of future application

The project work should be an individual project and a project report should be submitted at the end of the semester. The students shall defend their project in front of experts during practical examinations.

YEAR – II		18PIT31
SEMESTER - III	MOBILE APPLICATION DEVELOPMENT	HRS/WK – 4
MAIN - 7		CREDIT - 4

To make the students to acquire mobile application development skills in Android.

#### **Course Outcomes:** At the end of the Course the students should possess

CO1: Knowledge pertaining to basic of Android..

CO2: Proficiency in Activities in Android.

**CO3:** Proficiency in Layouts and views.

CO4: Proficiency in Views and Data Persistence.

#### **CO5:** Knowledge pertaining to Databases and communication.

YEAR – II
SEMESTER - III
<b>MAIN - 8</b>

Building blocks of PHP: Basic syntax - Variables - Data Types - Operators and expressions-Constants. Flow Control: Switch flow- Loops- Code Block- Sending data to the browser-Working with Arrays: Arrays- Creating array- Array related Functions-Working with Function: Function-Calling Function- Defining Function- Returning the Values from user defined function- Variable Scope- Argument.

#### UNIT - II

Working with Strings, Date and Time Functions: Formatting String with PHP- Date and TimeFunction-StringManipulation and InvestigatingStrings with PHP-Working with Forms: Creating form- Handling form- Validating form data- Accessing form data- use of Hidden fields to save State- Redirecting user- file Upload-Working with Cookies and User Session: Introduction of Cookie- Setting a Cookie with PHP-Introduction of Session and Improving Session Security- Starting a Session- Working with Session Variables- Passing Session Id in the query String- Destroying Session and Unsetting Variables.

#### **UNIT - III**

Error Handling and Debugging: General error types and debugging- displaying PHP errors-Adjusting Error Reporting- Creating Custom error handler- PHP debugging techniques-Filter: Types of Filter- Functions of Filter- Validate the data with filter option and sanitize-Working with files: Include Files with INCLUDE- creating and deleting files- opening a file for reading- writing or Appending- Reading from files- Validating Files.

#### **UNIT - IV**

Working with Directories: Directory related function- \$DIR object in PHP-Working with Images: Image related function- Miscellaneous function-Introduction To OOP: The basic- auto loading objects- Class- Extends- Constructs- Scope Resolution Operator- Parent- serializing object- The magic objects sleep and awake- reference inside the constructor- comparing objects- Visibilityoverloading- object interface- pattern- magic method.

#### UNIT - V

Learning Basic SQL **Command:** Table Creation-Insert row-Select Command and Delete Command-Using Where Clause-Update Replace Command-String Function- Date and Time Functions- Stored Procedures- Join- Indexing and Sorting query-Using MySQL with PHP: Connecting to MySQL and selecting the database- executing simple queriesretrieving query results- counting return Records- updating- Record Addition- Viewing Record- and Deletion Record with PHP.

## UNIT - I

**Introduction:** Introduction to Distributed Systems, What is a Distributed System?, Hard ware concepts, Software concepts, Design issues.

### UNIT - II

**Inter-Process Communication:** Communication in Distributed Systems, Lay red Protocols, ATM networks, The Client – server model, Remote Procedure call, Group communication.

### UNIT - III

**Synchronization :** Synchronization in Distributed System, Clock Synchronization, Mutual Exclusion, Election algorithms, Atomic transactions, Deadlocks in Distributed Systems.

#### UNIT - IV

**Processor allocation and Real Time Systems:** Process and processors in Distributed System threads, System Models, Processors allocation, Scheduling in Distributed System, Fault tolerance, Real time Distributed System.

#### UNIT - V

**File system and Shared memory:**Distributed File Systems, Distributed File System Design, Distributed File System implementation, Trends in Distributed File System.Distributed Shared Memory, Introduction.

#### **TEXT BOOK:**

1. Andrew S. Tanenbanm, Distributed Operating Systems, Prentice Hall.

#### **REFERENCE BOOKS:**

ELECTIVE $-IV(2)$

#### **18EPI34A** HRS/WK - 5 **CREDIT - 5**

#### UNIT - I

Introduction to Artificial Intelligence: The AI problems – The underlying Assumption – What is an AI technique? - The level of the model - Criteria for success - Problems, Problem spaces and Search: Defining the problem as a state space search – production systems – problem characteristics - production system characteristics - Issues in the design of search programs.

#### UNIT - II

Heuristic Search Techniques: Generate and test – Hill Climbing – Best First Search (A\* Search) – Problem Reduction (AO \* Algorithm) - Constraint Satisfaction - Means-Ends Analysis -Knowledge Representation Issues: Representation and Mappings - Approaches to Knowledge Representation - Issues in Knowledge Representation.

#### UNIT - III

Using Predicate logic: Representing simple facts in logic – Representing Instance and ISA Relationships - Computable functions and Predicates - Resolution - Natural Deduction -Representing knowledge using Rules: Procedural versus Declarative knowledge - Logic programming – Forward versus Backward Reasoning.

#### UNIT - IV

Natural Language Processing: Introduction – Syntactic processing – Semantic Analysis – Learning : What is Learning? - Rote Learning - Learning from Examples: Induction - Explanation based Learning - Discovery - Analogy - Formal Learning theory - Neural net learning and Genetic learning.

#### UNIT - V

Perception and Action: Real time search – Perception – Action – Robot Architectures – Case study on Robot Architecture.

#### ANDROID APPLICATIONS AND WEB DEVELOPMENT USING PHP

#### **ANDROID APPLICATIONS:**

- 1. Write android program to change the background of your activity.
- 2. Write android program to perform all operations using calculators.
- 3. Write android program to change image displayed on the screen
- 4. Write android program to demonstrate action button by implementing on click listener.
- 5. Write android program to demonstrate countdown timer application.
- 6. Write android program to demonstrate layouts in an activity.
- 7. Write android program to display Google Maps in Android.
- 8. Write android program to reading and writing to a file on SD card.
- 9. Write android program to read and write to a SQLite database in Android.
- 10. Write android program to demonstrate content providers in Android.

#### PHP:

- 1. String and Date functions in PHP.
- 2. Form creation using POST method
- 3. Database Operations using mysql.
- 4. Login form using session.
- 5. Class and Object in PHP.
- 6. Student mark list creation with validation.
- 7. Electricity bill preparation.
- 8. Develop a simple online shopping cart.
- 9. Develop a simple bank application.
- 10. Develop an application for employee pay slip.

#### YEAR – II SEMESTER - III PROJECT - III

### ANDROID APPLICATIONS OR WEB DEVELOPMENT USING PHP

#### **About the Project:**

- The project is of 5 hours/cycle for each semester duration and a student is expected to do planning, analysing, designing, coding, and implementing the project.
- The initiation of project should be with the project proposal.
- The synopsis approval will be given by the project guides.

#### **Problem:**

• Develop a project by choosing any topic in Android Applications or Web Development using PHP.

#### The project proposal should include the following:

- Title
- Objectives
- Input and output
- Details of modules and process logic
- Limitations of the project
- Tools/platforms, Languages to be used
- Scope of future application

The project work should be an individual project and a project report should be submitted at the end of the semester. The students shall defend their project in front of experts during practical examinations.

YEAR-II		18JPIT44
SEMESTER - IV	MAIN PROJECT	HRS/WK-30
MAIN PROJECT		CREDIT - 11

#### **Objective:**

To expose the students to industry atmosphere and help them to gain knowledge on software development.

#### At the end of the Course the students should possess

CO1: Project Analysis Technical Skill.
CO2: Project Designing Technical Skill.
CO3: Project Coding Technical Skill.
CO4: Project Testing Technical Skill.
CO5: Project Implementation Technical Skill

YEAR-II				
SEMESTER - IV				
MAIN PROJECT				

#### FORMAT FOR PREPARING MAIN PROJECT REPORT

#### **Arrangement of contents**

- 1. Title Page
- 2. Bonafide Certificate
- 3. Acknowledgement
- 4. Table of contents
- 5. Abstract
- 6. Chapters of the Report
- 7. References
- 8. Appendices, if any

Appendices should be named as APPENDIX – A

APPENDIX - B

#### **BINDING SPECIFICATION**

- Report should be found using flexible cover of thick white art paper.
- The Spine for the bound volume should be of black calio of 2cms width.
- The Cover should be printed in block letters.

#### MARGIN SPECIFICATION

Тор	:	4 cms
Bottom	:	3 cms
Left	:	4.5 cms
Тор	:	2.5 cms

#### PAGE NUMBERING

All Page numbers should be typed without punctuation on the bottom-center portion of the page. The Preliminary pages (table of contents and abstract) should be numbered in lowercase roman literals. Papers of main text, starting with Chapter-1, should be consecutively numbered using Arabic numerals.
